### NIGHT GARROTING.

In the old days of New York one of the tales of desperate attack thrilled the provincial towns with a great awe of the dan- they be avoided? gers of the metropolis.

We have whitewashed the town into a prosaic correctness now, at least relatively,

Yet on Wednesday night a citizen dent. was attacked a little after midnight on Broadway just at Union Square. The thieves did not succeed in rob bing him. But the point to be made is that during the attack, which lasted some five minutes' despite the vells of the victim for the police, not a bluecoat showed up. This at Union Square, with its "sparrow police," and in the neighborhood of Fourteenth street. There are dozens of cafes and drinking saloons in this vicinity, and policemen should be on duty there.

Last night proved that they were not, for the thieves. It is no exaggeration to say that one can frequently go for squares along Sixth and Fifth avenues at night pumpkin. without encountering a single "copper."

It would be a good thing for the Commissioners to be exceedingly severe on police men brought before them for drunkenness. losting in saloons, being asleep while on post or absent from it.

### OH, BEATTIE, GO !

The unutterably filthy condition of this city has reached a pass where further patience is not only weakness, but is im possible. The soft weather, acting on the collected mounds of snow, frescoed with dirt, has left broad, depthful pools of nasty water at the beginning and end of the street crossings, while the walking on downtown Broadway pavements is like a pedestrian trip through a Brobdignagian pan of fresh caramels.

And the end is not yet! The snow is not all gone. Wading will never be a lost art in New York so long as BEATTIS holds the fort. It is too, too much. The walking thousands get their feet soaked to the bone and their clothes bedraggled, while the carriage folk return from an outing with vehicles that look as if they had been at a fele champetee in a brick yard.

We don't want this. But we have got to have it while BEATTIE is in the Street-Cleaning Department. Therefore, as the citizen are not so passionately devoted to Mr. BEATTIE as to wish to pay him for notably distressing them, it follows that we don't

Why should be not be magnanimous and retire at once. We thought we could stand refire at once. We thought we could stand having the city a seive for all sorts of refuse a month longer, but it is too trying. We shgat figure, graceful, with finely cut features, child, von simply made it for life; that a cannot. Mr. BEATTIE, do one grateful thing, and get out !

## AN IMPORTANT CHANGE.

The germ theory in consumption is now so generally received among the learned in therapeuties that the isolation of consump tives is urged as the most rational of meas ures to prevent the spread of the disease. It is regarded as a distinctly contagious malady, and its contraction is believed to be more largely due to the dissemination of the fatal bacilli than to heredity.

The subject is one worthy of the closest and deepest study. The disease is the most common of any malady, not an epidemic As soon as investigation shall warrant it the seclusion of patients seems to be desirable, though obviously difficult of accomplishment in a disease of so long a course and affecting all classes of society.

## PRISON PIRES.

A raging fire in a large prison is a very frightful affair. Clinton Prison was the scene of such a catastrophe last night. Men locked in little boxlike cells which are filled with hot and blinding smoke may well be terrorized. The poor wretches clamored for their release, pressing their

white faces against the bars. They were extricated as soon as possible. It speaks well for the prison discipline that only two tried to escape, and their attempt was instantly frustrated. Most of them set to with a will to fight the flames, and were of the greatest assistance in arresting its progress. The murderer-murdering dynamo plant was completely destroyed.

## FOR SHAME!

It is bad enough to shoot the masculine redskin without sufficiently justifying cause, but to pour hot lead into the squaws is disgraceful. There is far more reason for killing the boys, which is nipping an Indian in the bud.

A number of Indian women were killed at Wounded Knee Creek last Monday, and probably others have been shot down else where. Let this stop at once. It is inhuman unjust and unmanly. Do not put this ugly state on the Stars and Stripes.

It would appear that the statutes concerning pensions, if they admit of a construction favorable to such deserters strongly need reconstruction.

The weather report says that the pearly mist which has swathed New York in its gauzy folds and is still clinging to the town is a local thing. But it is local in nearly every place, in the country. A warm wave surged across the land and touched the snow-decked towns into a cloud of mist. It is a nasty, humid, depressing thing, no hearty "good-by" awaits its departure.

## PULLED DOWN TO DEATH.

All Because He Refused to Pin Up His Long Coat-Talls.

You have perhaps journeyed between New Orleans and Mobile, and remember Pulitzer Building, the vast expanse of march with waterways New Orleans and Mobile, and remember cutting through it. In the midst of this desolation is a club-house and a railway station called English Lookout. It is still good fishing and shooting ground, but the alligator has become so scarce that the sight of of one is a novelty. Ten or twelve years ago they crawled across the ratiroad tracks, and passengers had but to look out of the windows to see them swimming. One day, during my week's stay at the

club, several boats were going out, and one of them was occupied by a French army officer, who was also a guest, says a writer in the Detroit Free Press. He had on a frock cost, and when seated in the stern of the skiff the tails almost touched the water "Better take off that coat or pin the tails up," said one of the punters, as his attention was directed.
"Why?"
"Because an alligator may pull you over-

"Because an alligator may pull you overboard."

The Frenchman laughed and shrugged his shoulders and led the way down channel. Four boats of us anchored about 100 feet apart, and the craft I was in was next to the officer's. The fish were biting hot and heavy, and for an hour no one paid any attention to anybody else. I tangled my line while pulling in a fish, and while working at the knots happened to glance toward the Frenchman. Just as I did so I saw the still waters broken behind him, caught sight of a black object thrust above the surface, and next instant, uttering a scream which was heard half a mile away, the man was pulled out of the boat and under water.

We hurried to the spot, but nothing whatever marked the site of the tragedy. Even his hat had gone down with him. We rowed up and down and beat the banks, but it was useless.

"Told him so," said the punter as we was used to the search. "Them foreigners don't seem to know nothing about 'gators. We had a Prussian here last month, and what did he do but hang his legs in the water, and he was pulled off the boat with me only four feet away."
